NetTrack

The permanent website storage service

Internet has rapidly developed into an essential source of information. The days of a website being considered a static, electronic brochure are long gone. Websites are updated constantly, and as such gain strength as information sources.

NetTrack

Capsis has developed NetTrack, which makes the storage and management of old websites easily accessible to everyone. NetTrack is available in two variants: NetTrack Easy and NetTrack Control.

NetTrack Easy

With NetTrack Easy, you can show what was on your website, and when and how. With a subscription to NetTrack Easy your website is archived automatically. You don't have to do anything. If the archive is to be published, this can be done simply through your existing website.

NetTrack Easy is an online service that Capsis offers to users who "just want to archive the website" and do not want to spend too much time on it. NetTrack Easy delivers exactly this. You subscribe and NetTrack ensures your website is archived. You can browse easily through the archive using the straightforward Viewer.

NetTrack Control

NetTrack Control offers an extremely user-friendly environment for archiving, viewing and exploring stored websites. The application is automated to a large extent, making it quick and efficient to pick up new websites. You can view a website with one click of the mouse.

Features of NetTrack

The main features of NetTrack set out in a row; NetTrack:

- ensures you can comply with the Public Records Act,
- works according to international standards,
- offer a highly cost-efficient way of storing websites in the longer term,
- stores websites for long periods,
- publishes your archive in a straightforward manner if desired.

NetTrack provides a search function which enables accurate searching. Apart from web pages, you can also search files in other formats such as Microsoft Word, Microsoft PowerPoint Adobe Acrobat PDF or Open Document texts and spreadsheets.

The servicedesk is available by email.
